

The schematic diagram illustrates the electronic circuit for the 'SQUADRA' receiver. It features three vacuum tube stages: AF116/AF126, AF117/OC169, and OC169/AF117. The circuit includes various components such as resistors, capacitors, and diodes, with a power supply section at the bottom right. The components are labeled with their respective values and types, and the circuit is identified as 'REGOLATORE N. 9947'.
